DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-7 and 10-13, are drawn to a collet assembly, classified in class 279, subclass 46.2.

II. Claims 8, 9 and 14-17, are drawn to a process for manufacturing a collet, classified in class ²⁷~~403~~, subclass ⁵⁵⁷~~127~~.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as metal casting, tempered molding or by sheet metal cutting.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

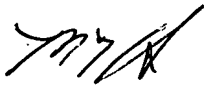

Art Unit: 3722

A telephone call was made to Karl M. Steins on August 11, 1999 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
